Somfy hereby declares that this product complies with the essential requirements and other relevant provisions of Directive 1999/5/EC. A Declaration of Conformity is available at www.somfy.com. Usable in EU, CH and NO.ES - Por la presente, Somfy declara que el aparato cumple los requisitos básicos y demás disposiciones pertinentes de la directiva 1999/5/CE. Podrá encontrar una declaración de conformidad en la página web www.somfy.com. Aplicable para la UE, Suiza y Noruega.PT - Peço-lhe a sua atenção, Somfy declara que o aparelho está conforme com as exigências essenciais e outras disposições pertinentes da Directiva 1999/5/CE. A Declaração de Conformidade encontra-se no site www.somfy.com.Hungary: Somfy Kft
Declara que o aparelho está conforme com as exigências essenciais e outras disposições pertinentes da Directiva 1999/5/CE. A Declaração de Conformidade encontra-se no site www.somfy.com.El - Me temo que é porque o Somfy declara que el dispositivo cumple con las normas básicas y demás disposiciones pertinentes de la directiva 1999/5/CE. Pode encontrar una declaración de conformidad en la página web www.somfy.com.NL - Met de voorbereiding dat de Somfy verklaart dat het apparaat voldoet aan de essentiële vereisten en andere relevante voorzchriften van de richtlijn 1999/5/EG. U kunt de declaratie van conformiteit vinden op de website www.somfy.com.DE - Ich erkläre hiermit, dass das Produkt die wesentlichen Anforderungen und andere relevante Vorschriften der Richtlinie 1999/5/EG erfüllt. Eine Deklaration der Konformität ist unter www.somfy.com verfügbar.FR - Somfy déclare que l'appareil est conforme aux exigences essentielles et autres dispositions pertinentes de la directive 1999/5/CE. Vous pouvez trouver une déclaration de conformité sur le site www.somfy.com.IT - Somfy dichiara che questo prodotto è conforme alle norme essenziali e alle altre disposizioni pertinenti della direttiva 1999/5/CE. La dichiarazione di conformità è disponibile sul sito www.somfy.com.ES - Somfy declara que este producto cumple con las normas básicas y otras disposiciones pertinentes de la directiva 1999/5/CE. Puede encontrar una declaración de conformidad en la página web www.somfy.com.PT - Somfy declara que o aparelho está de acordo com as exigências essenciais e outras disposições pertinentes da Directiva 1999/5/CE. Pode encontrar uma declaração de conformidade na página web www.somfy.com.HU - Somfy kéri, hogy az eszköz teljesít a 1999/5/EG direktívának a fő követelményei és más vonatkozó előírásai szerint. A teljesítményt a www.somfy.com oldalon található összefoglalóban tekintheti meg.NL - Somfy verklaart dat dit apparaat voldoet aan de essentiële vereisten en andere relevante voorzchriften van de richtlijn 1999/5/EG. U kunt de declaratie van conformiteit vinden op de website www.somfy.com.DE - Somfy erklärt, dass das Gerät die wesentlichen Anforderungen und andere relevante Vorschriften der Richtlinie 1999/5/EG erfüllt. Eine Deklaration der Konformität ist unter www.somfy.com verfügbar.FR - Somfy déclare que cet appareil est conforme aux exigences essentielles et autres dispositions pertinentes de la directive 1999/5/CE. PT - Somfy declara que o aparelho está de acordo com as exigências essenciais e outras disposições pertinent

EN 6.4 Setting the sun sensitivity threshold

The sensitivity threshold setting can be changed according to the actual weather conditions and requirements:
 - Turn the Sun potentiometer until the Sun LED (h) is permanently lit green.
 ► The sun sensor's sensitivity threshold is set according to the current level of sunshine.

Caution:

- Sun LED off: the sensitivity threshold set has not been reached, the sun is shining below the set threshold; the awning does not move.
- Sun LED permanently lit green: the sensitivity threshold set has been reached, the sun is shining above the set threshold; the awning is lowered automatically after a few minutes.

► See Picture H

7. Use and operation

7.1 Wind Function

This applies to just a Eolis RTS sensor or a Soliris RTS sensor with the Sun function deactivated.

7.1.1 If the wind begins to blow

- If the wind begins to blow and the speed corresponds to the sensitivity threshold set:
 ► The Wind LED is permanently lit red.
 ► The wind sensor automatically raises the awning to protect it.

Caution: It is impossible to prevent the awning from being raised and lowered when the wind is blowing at speeds above the threshold set.

► See Picture I

7.1.2 If the wind stops blowing

- When the sensor has not detected any wind for 30 seconds:
 ► The Wind LED goes off.
- The awning can then be lowered by pressing:
 ► the Down button to reach the lower end limit or
 ► the STOP/My button to reach the intermediate position (my).

► See Picture J

7.2 Wind and Sun Functions

These apply to an Eolis RTS sensor linked to an outdoor Sun sensor (Sunis RTS type sensor) or a Soliris RTS sensor.

7.2.1 Activating the Sun function

Activate the Sun function using a remote control equipped with the Sun function (refer to the remote control guide for more information).

7.2.2 If there is no wind

- If the sun is shining above the sun sensitivity threshold set and the wind sensitivity threshold is not reached

► See Picture M

b) If there is no wind and the sun disappears

- When the sensor has not detected any wind for 30 seconds and the level of sun is below the sun sensitivity threshold set:

► See Picture L

- The Wind LED is off.
- The Sun LED is permanently lit green.
- The sensor will automatically lower the awning after 2 minutes, or
- The awning can be controlled manually using the remote control.

► See Picture K

b) If there is no wind and the sun disappears

- When the sun level is below the sun sensitivity threshold set and the wind sensitivity threshold is not reached

► See Picture L

- The Wind LED remains off.
 - The Sun LED goes off.
 - The sensor will automatically raise the awning after a delay of 15 to 30 minutes, or
 - The awning can be controlled manually using the remote control.
- This delay prevents the awning from making unnecessary movements every time a cloud crosses the sun, for example.

► See Picture L

7.2.3 If the wind begins to blow

- If the wind begins to blow and the wind speeds meets the sensitivity threshold set, whatever the level of sun:
 ► The Wind LED is permanently lit red.

The sensor automatically raises the awning to protect it.

Caution: It is impossible to prevent the awning from being raised and lowered when the wind is blowing at speeds above the threshold set.

► See Picture I

7.2.4 If the wind stops blowing

- When the sensor has not detected any wind for 30 seconds:
 ► The Wind LED goes off.

The awning can then be lowered by pressing:
 ► the Down button to reach the lower end limit or
 ► the STOP/My button to reach the intermediate position (my).

► See Picture J

a) If the wind dies down and the sun appears

- When the sensor has not detected any wind for 30 seconds and the sun is shining above the sun sensitivity threshold set for at least 12 minutes:
 ► The Sun LED is permanently lit green.

The Wind LED remains off.

- The sensor will automatically lower the awning after these 12 minutes, or

The awning can be controlled manually using the remote control.

► See Picture J

b) If the wind dies down and the sun disappears

- When the sensor has not detected any wind for 30 seconds and the level of sun is below the sun sensitivity threshold set:

► See Picture L

► See Picture L

c) If the wind begins to blow

If the wind begins to blow and the wind speeds meets the sensitivity threshold set, whatever the level of sun:
 ► The Wind LED is permanently lit red.

The sensor automatically raises the awning to protect it.

Caution: It is impossible to prevent the awning from being raised and lowered when the wind is blowing at speeds above the threshold set.

► See Picture I

d) If the wind stops blowing

When the sensor has not detected any wind for 30 seconds:
 ► The Wind LED goes off.

The awning can then be lowered by pressing:
 ► the Down button to reach the lower end limit or
 ► the STOP/My button to reach the intermediate position (my).

► See Picture J

e) If the wind dies down and the sun appears

When the sensor has not detected any wind for 30 seconds and the sun is shining above the sun sensitivity threshold set for at least 12 minutes:
 ► The Sun LED is permanently lit green.

The Wind LED remains off.

The sensor will automatically lower the awning after these 12 minutes, or

The awning can be controlled manually using the remote control.

► See Picture J

f) If the wind dies down and the sun disappears

When the sensor has not detected any wind for 30 seconds and the level of sun is below the sun sensitivity threshold set:

► See Picture L

g) If the wind begins to blow

If the wind begins to blow and the wind speeds meets the sensitivity threshold set, whatever the level of sun:
 ► The Wind LED is permanently lit red.

The sensor automatically raises the awning to protect it.

Caution: It is impossible to prevent the awning from being raised and lowered when the wind is blowing at speeds above the threshold set.

► See Picture I

h) If the wind stops blowing

When the sensor has not detected any wind for 30 seconds:
 ► The Wind LED goes off.

The awning can then be lowered by pressing:
 ► the Down button to reach the lower end limit or
 ► the STOP/My button to reach the intermediate position (my).

► See Picture J

i) If the wind dies down and the sun appears

When the sensor has not detected any wind for 30 seconds and the sun is shining above the sun sensitivity threshold set for at least 12 minutes:
 ► The Sun LED is permanently lit green.

The Wind LED remains off.

The sensor will automatically lower the awning after these 12 minutes, or

The awning can be controlled manually using the remote control.

► See Picture J

j) If the wind dies down and the sun disappears

When the sensor has not detected any wind for 30 seconds and the level of sun is below the sun sensitivity threshold set:

► See Picture L

k) If the wind begins to blow

If the wind begins to blow and the wind speeds meets the sensitivity threshold set, whatever the level of sun:
 ► The Wind LED is permanently lit red.

The sensor automatically raises the awning to protect it.

Caution: It is impossible to prevent the awning from being raised and lowered when the wind is blowing at speeds above the threshold set.

► See Picture I

l) If the wind stops blowing

When the sensor has not detected any wind for 30 seconds:
 ► The Wind LED goes off.

The awning can then be lowered by pressing:
 ► the Down button to reach the lower end limit or
 ► the STOP/My button to reach the intermediate position (my).

► See Picture J

m) If the wind dies down and the sun appears

When the sensor has not detected any wind for 30 seconds and the sun is shining above the sun sensitivity threshold set for at least 12 minutes:
 ► The Sun LED is permanently lit green.

The Wind LED remains off.

The sensor will automatically lower the awning after these 12 minutes, or

The awning can be controlled manually using the remote control.

► See Picture J

n) If the wind dies down and the sun disappears

When the sensor has not detected any wind for 30 seconds and the level of sun is below the sun sensitivity threshold set:

► See Picture L

o) If the wind begins to blow

If the wind begins to blow and the wind speeds meets the sensitivity threshold set, whatever the level of sun:
 ► The Wind LED is permanently lit red.

The sensor automatically raises the awning to protect it.

Caution: It is impossible to prevent the awning from being raised and lowered when the wind is blowing at speeds above the threshold set.

► See Picture I

p) If the wind stops blowing

When the sensor has not detected any wind for 30 seconds:
 ► The Wind LED goes off.

The awning can then be lowered by pressing:
 ► the Down button to reach the lower end limit or
 ► the STOP/My button to reach the intermediate position (my).

► See Picture J

q) If the wind dies down and the sun appears

When the sensor has not detected any wind for 30 seconds and the sun is shining above the sun sensitivity threshold set for at least 12 minutes:
 ► The Sun LED is permanently lit green.

The Wind LED remains off.

The sensor will automatically lower the awning after these 12 minutes, or

The awning can be controlled manually using the remote control.

► See Picture J

r) If the wind dies down and the sun disappears

When the sensor has not detected any wind for 30 seconds and the level of sun is below the sun sensitivity threshold set:

► See Picture L

s) If the wind begins to blow

If the wind begins to blow and the wind speeds meets the sensitivity threshold set, whatever the level of sun:
 ► The Wind LED is permanently lit red.

The sensor automatically raises the awning to protect it.

Caution: It is impossible to prevent the awning from being raised and lowered when the wind is blowing at speeds above the threshold set.

► See Picture I

t) If the wind stops blowing

When the sensor has not detected any wind for 30 seconds:
 ► The Wind LED goes off.

The awning can then be lowered by pressing:
 ► the Down button to reach the lower end limit or
 ► the STOP/My button to reach the intermediate position (my).

► See Picture J

u) If the wind dies down and the sun appears

When the sensor has not detected any wind for 30 seconds and the sun is shining above the sun sensitivity threshold set for at least 12 minutes:
 ► The Sun LED is permanently lit green.

The Wind LED remains off.

The sensor will automatically lower the awning after these 12 minutes, or

The awning can be controlled manually using the remote control.

► See Picture J

v) If the wind dies down and the sun disappears

When the sensor has not detected any wind for 30 seconds and the level of sun is below the sun sensitivity threshold set:

► See Picture L

w) If the wind begins to blow

If the wind begins to blow and the wind speeds meets the sensitivity threshold set, whatever the level of sun:
 ► The Wind LED is permanently lit red.

The sensor automatically raises the awning to protect it.

Caution: It is impossible to prevent the awning from being raised and lowered when the wind is blowing at speeds above the threshold set.

► See Picture I

x) If the wind stops blowing

When the sensor has not detected any wind for 30 seconds:
 ► The Wind LED goes off.

The awning can then be lowered by pressing:
